RE: Lord-Shope Landfill Superfund Site
Modification in sampling frequency monitoring well W-33 request

Dear Messrs. Manzo and Balcer:

The United States Environmental Protection Agency (EPA), has completed its review of the: December 11, 2007 letter from Arcadis regarding the modification to the sampling frequency of well W-33 at the Lord-Shope Superfund Site (Site), Girard Pennsylvania. This correspondence serves as the official notification that EPA accepts the proposal to sample well W-33 on an annual basis rather than a quarterly basis. It is EPA's understanding that W-33 will be included in the annual groundwater sampling program at the Site in 2008.

If you wish to discuss please contact me at email address: turner.david@epa.gov or by telephone at (215) 814-3216.

Sincerely,

David P. Turner
Remedial Project Manager (RPM)
